

Learning and Higher Cognitive Processes

Ba/Y1/PSY007

Spring Semester, 2020/2021

Assessment 1: PARTIAL ASSESSMENT 1: CONCEPT MAP

Weighting: 10%

Date and method of submission: Week 4 – completed at home and submitted through the virtual learning platform (NEOImS)

Word count or equivalent: no word count applied

Assessment 1: PARTIAL ASSESSMENT 1: CONCEPT MAP (10% of final mark)

In Week 4, you will complete a partial assessment consisting of the elaboration of a concept map encompassing the contents of the first four weeks of the module (*Block 1. An introduction to learning*).

The goal is that you get the opportunity to review the contents, synthesising them and establishing connections between them in such a way that they generate a comprehensive overview.

You will be expected to elaborate your concept map either on paper (you will later take a photograph of it) or with any kind of software (plenty of free and user-friendly versions are available on the Internet, such as draw.io or [canva](https://canva.com)) that you might find useful.

Some materials including basic guidelines to follow in the elaboration of a concept map will have been provided to you in advance.

The concept map will be elaborated at home and submitted through the virtual learning platform, NEOImS.
